4. FIRST AID MEASURES

4.1	Symptoms				
i	Most important symptoms and effects, both acute and delayed				
	Corrosion, Risk of blindness, Gastric perforation, Risk of serious damage to				
	eyes Material is extremely destructive to tissue of the mucous membranes and				
	upper respiratory tract, eyes, and skin., Cough, Shortness of breath, Headache,				
	Nausea.				
ii	Indication of any immediate medical attention & special treatment needed				
	If seeking medical attention, provide SDS document to physician.				
4.2	Description of first aid measures				
i	Inhalation : If inhaled, move victim to fresh air. Loosen tight clothing such as a collar, tie, belt or waistband. If breathing is difficult, administer oxygen. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.				
ii	Ingestion : Rinse mouth immediately and drink plenty of water. Call a physician immediately. If swallowed danger of perforation of the esophagus and the stomach (strong corrosive effects).				
iii	Skin contact : After contact with skin, wash immediately with plenty of water. Immediate medical treatment required because corrosive injuries that are not treated are hard to cure.				
iv	Eye contact : In case of contact with eyes flush immediately with plenty of flowing water for 10 to 15 minutes holding eyelids apart and consult an ophthalmologist. Protect uninjured eye.				

5. FIRE FIGHTING MEASURES

5.1	Extinguishing media	
İ	Suitable : extinguishing agents	Use Suitable extinguishing media Water spray, dry powder or carbon dioxide and extinguishing measures that are appropriate to local circumstances and the surrounding environment.
ii	Special hazards : arising from the substance or mixture	Oxidising. Severe corrosive hazard. May ignite other combustible materials. Very toxic or corrosive gases or vapours
iii	Special remarks on : Explosion Hazard	None
iv	Advice for firefighters :	Stay in danger area only with self-contained breathing apparatus. Prevent skin contact by keeping a safe distance or by wearing suitable protective clothing.
V	Additional : information	Keep up-wind to avoid fumes. Thermal decomposition or combustion products may include the following substances: Toxic and corrosive gases or vapours. Avoid breathing fire gases or vapours.

	Covering of drains. Take up mechanically. Control of dust.				

7. HANDLING AND STORAGE

7.1	Precautions for safe handling			
	Handle and open container with care. Avoid dust formation. Clear contaminated			
	areas thoroughly.			
7.2	Conditions for safe storage, including any incompatibilities			
	Keep locked up or in an area accessible only to qualified or authorized persons. Separately or together with other oxidizing substances only and away from sources of ignition and heat. Because of their oxidation potential these products can raise the burning rate of combustible substances substantially or ignite combustible substances on contact with them. Recommended storage temperature see product label.			
7.3	Specific end use(s)			
	The product has applications in the following industries such as synthesis of alkali metal iodates, aniline polymerization, and oxidation of organic sulfides, halides and in-situ iodine generation.			

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1	Control Parameters		
i	Ingredients with workplace control parameters		
	NA		
8.2	Exposure Controls		
i	Appropriate engineering controls		
	Use process enclosures, local exhaust ventilation, or other engineering controls to keep airborne levels below recommended exposure limits. If user operations generate dust, fume or mist, use ventilation to keep exposure to airborne contaminants below the exposure limit.		
	15		
ii	Personal protective equipment		
(a)	Eye / face protection		
	Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Safety glasses
